

The Aurora Series represents a sophisticated evolution in architectural illumination, offering a modular approach to modern lighting with both 5-head (9W) and 10-head (18W) configurations. Designed for seamless integration, the series is available in both a refined wide-trim for easy installation and a minimalist trimless version for a perfectly flush, high-end ceiling finish. Engineered for visual comfort, each unit features an innovative black anti-glare screen and fixed precision reflectors that provide superior luminance control and exact light distribution. Built from high-conductivity die-cast aluminum for optimal thermal management, the Aurora Series delivers a brilliant 1350-lumen output (10-head) at a professional-grade CRI 90+, balancing classic minimalist aesthetics with high-performance energy efficiency.

Aurora Linear Downlight

Technical Specification

Wattage	10w - 5 Head 18w - 10 Head
LPW	75
CCT	2700K,3000K,3500K,4000K,5000K 5CCT Selectable
CRI	90+ CRI
Dimming	Triac
Size	5 and 10 Head Options Available
Rating	Wet Location

Features

- Configurations: Modular 5-head or 10-head linear arrays.
- Mounting: Choice of Trimmed (labor-saving) or Trimless (seamless architectural) profiles.
- Optics: Fixed high-performance reflectors with a low-UGR anti-glare shield.
- Build: Premium die-cast aluminum housing for extended LED lifespan.
- Control: 100-277V AC input with Triac dimming capabilities.

Warranty
