

## BEFORE YOU BEGIN

### WARNING

Make sure power is **OFF** at the electrical panel before starting installation or any maintenance. Indoor installation only unless otherwise noted.

### SAFETY

This fixture must be wired in accordance with local electrical codes and ordinances. All work should be done by a qualified electrician.

### NOTE

Read all instructions before installing. Keep this sheet for future reference.

### AIM

Mount 4–8" from the wall for an even grazing wash. Closer offsets emphasize texture; farther offsets soften it.

## INSTALLATION

- 01 Turn power OFF at the electrical panel.
- 02 Mark mounting positions — bracket every 24" maximum. (FIG. 1)
- 03 Pre-drill and install anchors per substrate.
- 04 Drill through using screws on the provided mounting clips
- 05 Using the provided starter wire, connect one end into the beginning of the run, and the other end to the junction box.
- 06 Wire-nut: black-black, white-white, ground-green. Use 277 V red lead if applicable.
- 07 Restore power and aim the optic by hand to the desired graze. (FIG. 2)

## JOINING CONTINUOUS RUNS

- 01 Align modules end-to-end (FIG. 3)
- 02 Connect the cables one to the other
