

IMPORTANT INFORMATION

CLASS I · This is a Class I product and **must be grounded**. All electrical connections must comply with local and national electrical code.

SURFACE · Do not install on newly plastered or damp surfaces.

LEDs · The LEDs in this fixture are not field-replaceable.

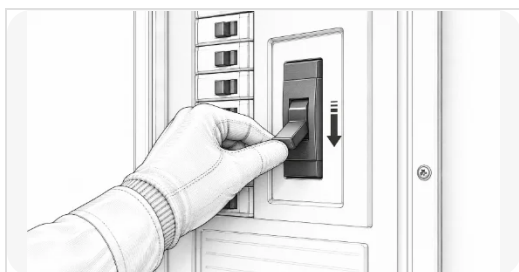

WIRING REFERENCE — CLASS I

■ Line / Live	BLACK
□ Neutral	WHITE
■ Earth / Ground	GREEN

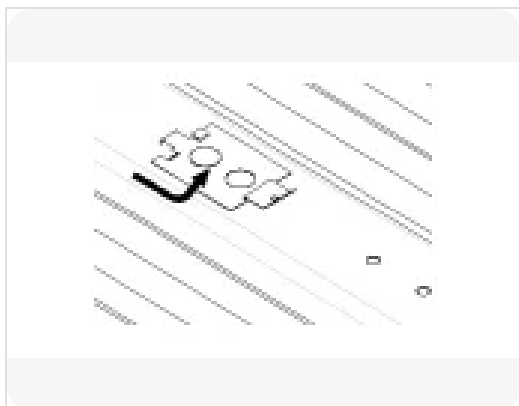

SUGGESTED METHOD OF INSTALLATION

**01**

Read these instructions and confirm you have all tools and accessories required.

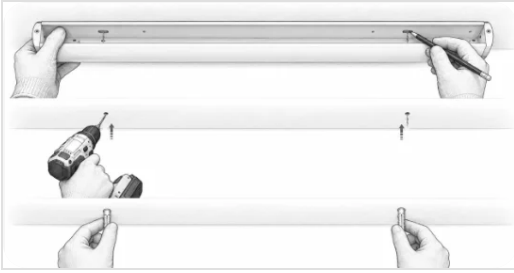

**02**

Turn off power at the main breaker before connecting.

**03**

Remove the wiring cover and connect supply leads to the 3-way terminal block. Ensure correct polarity and full grounding. All conductors must be fully sleeved and insulated. Replace the wiring cover.

SUGGESTED METHOD OF INSTALLATION (CONTINUED)

**01**

Mark anchor positions on the ceiling, drill, and install expansion screws.

**02**

Drill housing into the ceiling.

**03**

Reinstall lens, then end caps.

**04**

Turn on the main breaker. Verify uniform illumination across the run.

DISCLOSURE

This guide is provided for qualified installers and licensed electrical contractors. All electrical connections must comply with the National Electrical Code (NEC) and applicable local building and fire codes. Work should be performed only by personnel trained in low-voltage and line-voltage lighting installation.

DirectLED is not liable for injury, property damage, or product failure resulting from improper installation, modification, or use outside the specifications described in this document. Always disconnect power at the breaker before servicing any fixture.

Product specifications, dimensions, and accessory kits are subject to change without notice. Photography and diagrams in this guide are for reference only and may not reflect the exact finish, hardware, or revision of the product shipped. Where a discrepancy exists between this guide and the physical product, contact DirectLED technical support before proceeding.
