PROJECT NAME

MODEL NUMBER

TYPE

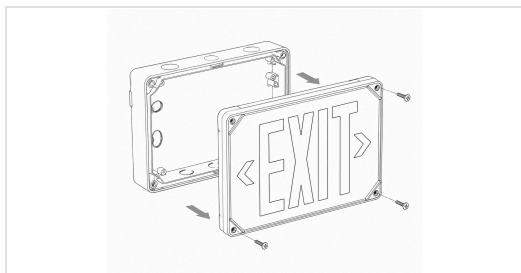

BEFORE YOU BEGIN

WARNING · Make sure power is **OFF** at the electrical panel before starting installation or any maintenance. Indoor installation only unless otherwise noted.

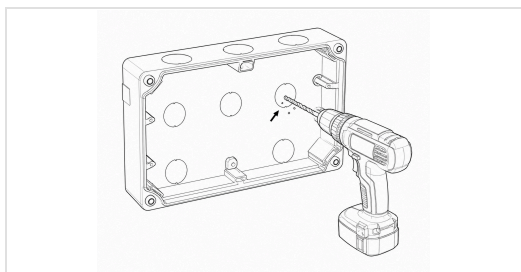

SAFETY · This fixture must be wired in accordance with local electrical codes and ordinances. All work should be done by a qualified electrician.

NOTE · Read all instructions before installing. Keep this sheet for future reference.

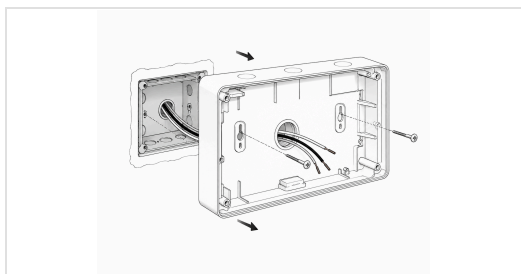

INSTALLATION

**01**

Remove the front cover and set aside.

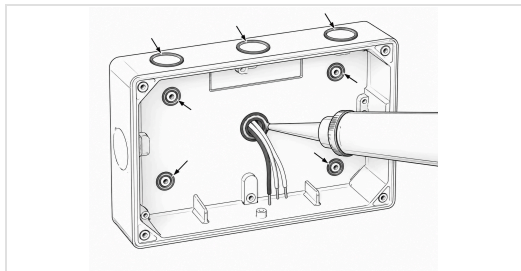

**02**

Pre-drill the holes in the knockouts provided.

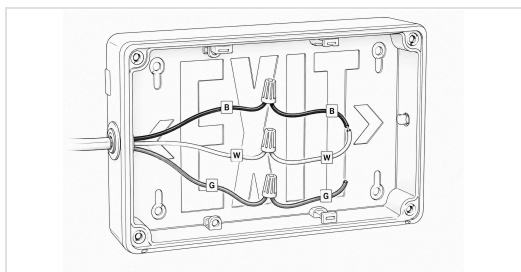

**03**

Mount the back of the housing to the junction box.

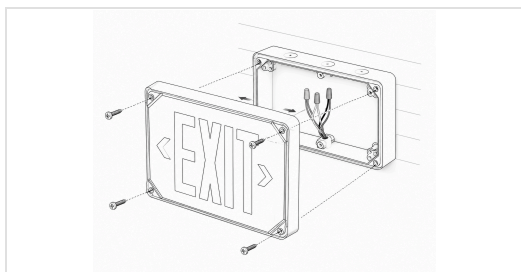

INSTALLATION (CONTINUED)

**01**

Apply silicone around each opening in the housing to ensure no water penetration is possible.

**02**

Connect supply wires to exit-sign wires — positive to positive, negative to negative.

**03**

Reinstall the front cover.

120 / 277 V · The exit sign supports 120 V or 277 V. Connect only one of the two supply wires; cap and tuck the unused conductor.

DISCLOSURE

This guide is provided for qualified installers and licensed electrical contractors. All electrical connections must comply with the National Electrical Code (NEC) and applicable local building and fire codes. Work should be performed only by personnel trained in low-voltage and line-voltage lighting installation.

DirectLED is not liable for injury, property damage, or product failure resulting from improper installation, modification, or use outside the specifications described in this document. Always disconnect power at the breaker before servicing any fixture.

Product specifications, dimensions, and accessory kits are subject to change without notice. Photography and diagrams in this guide are for reference only and may not reflect the exact finish, hardware, or revision of the product shipped. Where a discrepancy exists between this guide and the physical product, contact DirectLED technical support before proceeding.
