## BEFORE YOU BEGIN

### WARNING

Make sure power is **OFF** at the electrical panel before starting installation or any maintenance. Indoor installation only unless otherwise noted.

### SAFETY

This fixture must be wired in accordance with local electrical codes and ordinances. All work should be done by a qualified electrician.

### NOTE

Read all instructions before installing. Keep this sheet for future reference.

## INSTALLATION

- 01 Remove the front cover and set aside.
- 02 Pre-drill the holes in the knockouts provided.
- 03 Mount the back of the housing to the junction box.
- 04 Apply silicone around each opening in the housing to ensure no water penetration is possible.
- 05 Connect supply wires to exit-sign wires — positive to positive, negative to negative.
- 06 Reinstall the front cover.

### 120 / 277 V

The exit sign supports 120 V or 277 V. Connect only one of the two supply wires; cap and tuck the unused conductor.
