

Project Name: _____
Model Number: _____
Type: _____

NYNEMA INSTALLATION INSTRUCTION

1. Remove front cover and place aside
2. Pre-drill the holes in the knockouts provided
3. Mount the back of the housing to the junction box
4. Silicone around each opening in the housing ensuring no water penetration is possible.
5. Connect the positive wire from the buildings electrical source to the positive wire of the exit sign, and the negative wire from the buildings electrical source to the negative wire of the exit sign. Keep in mind the exit sign supports 277v and 120v. Only connect one of these wires.
6. Reinstall front cover.
